

## II. CLAIM AMENDMENTS

1 - 6. (Cancelled)

7. (Currently Amended) A message processing method for execution by a message processor, the method comprising the steps of:

providing, in the message processor of a mobile agent, a plurality of conversation threads and a conversation part object including a conversation thread control part that is capable of controlling the plurality of conversation threads;

halting the plurality of conversation threads;

sending the conversation part object through a network from the message processor to another place in another message processor; and

resuming the plurality of conversation threads at the another message processor.

8 - 17.(Cancelled)

18. (Currently Amended) A computer program product comprising a computer usable medium having computer usable program code for execution by a message processor of a mobile agent which is capable of sending a message to another message processor through a network, said computer program product comprising:

- a computer usable program code which instructs said message processor to halt a plurality of conversation threads;
- a computer usable program code which instructs said message processor to send a conversation part object which includes said plurality of conversation threads to another place in another message processor through said network, said plurality of conversation threads including a conversation thread control part that is capable of controlling the plurality of conversation threads; and
- a computer usable program code which instructs said other message ~~other~~ processor to resume said plurality of conversation threads.

19 - 21. (Cancelled)
